

FOREWORD:

HEY THERE! THANK YOU FOR TAKING THE TIME TO READ THIS ZINE!

Zine city exists because we wanted a place centered around collaborating on creating zines! We know there are a ton of creative minds out there who have been itching to make a zine but struggle a lot when working on their own.

Zine city is our solution! A casual environment with set deadlines that functions on a jump-in system. Mostly, we're just hoping to help give people that extra push they need to make something.

ISSUE EIGHT IS HERE!!! The theme this month is Sci-fi, after a close theme vote that was won LAST MINUTE. We got our lovely cover drawn by none other than Vitic who did such a great job!

July was probably a busy month for everyone, with Artfight going on. As of right now, the results aren't out yet... but god im hoping for a team Crystals win!! That being said- thank you so much to everyone who managed a submission even with Artfight happening this month.

Stay silly :3 - rat

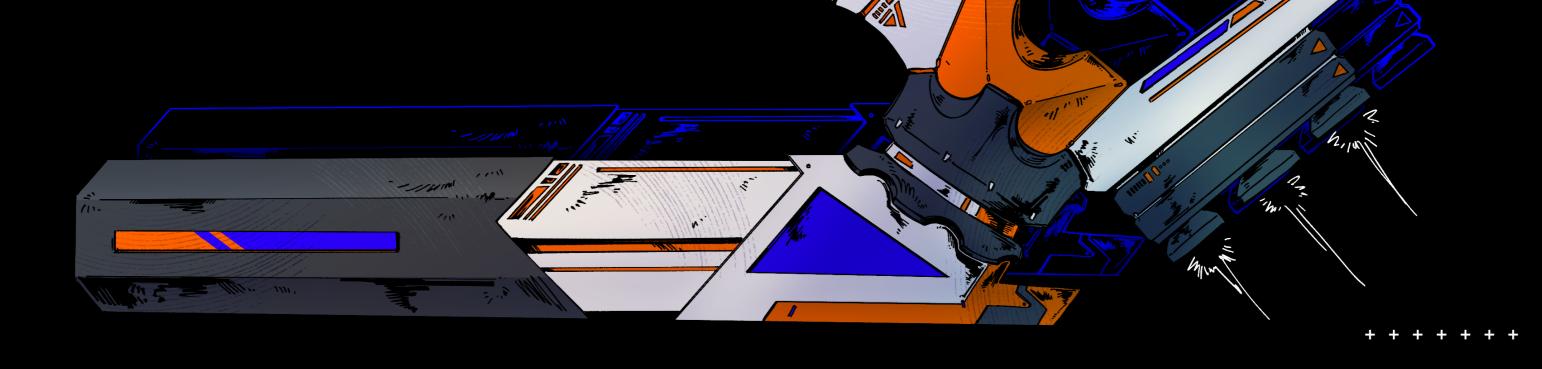

UNSPECIFIED AIRCRAFT CONCEPT

UNIT MK-3 LARGE SCALE CARGO TRANSPORT

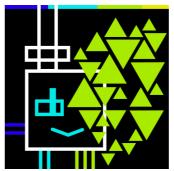

THIS IS MY AWESOME SPACESHIP DESIGN FOR HALFBOX.
THAT'S RIGHT, I CAN DRAW SCIFI GREEBLES. NOBODY BELIEVED IN ME. WELL, LOOK AT ME NOW.

Concepting and Notes for the Main species for my halfbox comic Basic Body template Mandibles attached to where jaw meets neck. Considered socially impolite to have them extended in public Long antennae are considered physically attractive but they're not the end all be all Even the attraction to length is dependent on area/region Hotter climates result in shorter back antennae and their chitin being more rigid and pronounced segmented Cold climates result in grown hair, longer antennae and softer chitin. Fun fact: The use and application of clothing one's self was developed as a direct response to their first approaches to exploration It became common to wear clothing outside of exploration around the time of the intial advances towards space travel
